This man's continual poisonous rhetoric concerning possums and other introduced species is based on lies and misinformation, 'iffy science', and his personal hate of possums. His personal misguided hate is destroying our eco system. <https://www.newsroom.co.nz/.../1080-new-truths-or-few-truths>. Based on that, another white feather is in order. Just a thought.

Shi Loh > Operation Ban 1080
 15 Nov '18
 I think killing 'Pests' using 1080 is the least of DoC's/ Government's concern. There's something sinister going on here. What is their real, underlying agenda???
 🙄🙄🙄
 where to from here???

Anti-1080ers expose the "real reason" behind 1080...

We are going to be killed so the government can reign Aotearoa as they like cause we are in their way. Nazis

They want to kill us. Cause they know there thieves and we know. They should all be prisoned. Fukn Jacinda

NWO!

Kauri die back is defiantly from 1080.

Totally about eugenics, that is undeniable

Killing off the inner earthers

I always had a theory that UFO were spying on us because they know this is going to happen, why they are always seen around the white house, I have no idea but we have become to advanced we are going to cause mass destruction. Maybe they abduct some human to experiment with to try save a species. It's just a race against time. My imagination is too big.

"Other" included:
 Destroying forest so land can be cultivated
 Destroying forest so land cannot be cultivated
 Killing off the "inner earthers" (a secret subterranean race)
 A part of a grander alien abduction plan
 Driving a mass urban migration and building megacities
 Freemasons controlling the country
 Killing off people to fix the housing crisis
 The world is jealous of Jacinda Ardern and wants to kill us

World control for elets need elimination of masses of people I believe they getting rid of our natural food supply also so when chip in hand is introduced most will think they need to get it to eat etc... It is coming but after 3 and a half years the Lord Jesus coming back and sort it out

To fulfill the new world order plan thru the TPPA

Money laundering scheme involving govt 4%

Eugenics project to create a master human race 6%

Agenda 21

They want to remove all of our supplies of food we won't be allowed to grow our own it's part of the New world order

Killing all people to sell the land 6%

Depopulation and controll kill the people to minimise growth and controll the food kill all animals and have controll of food by what they grow in a lab denie it to some people through costs depopulate more poison it to make people sicker more depopulation

Money making scheme involving govt/New World Order/Illuminati 5%

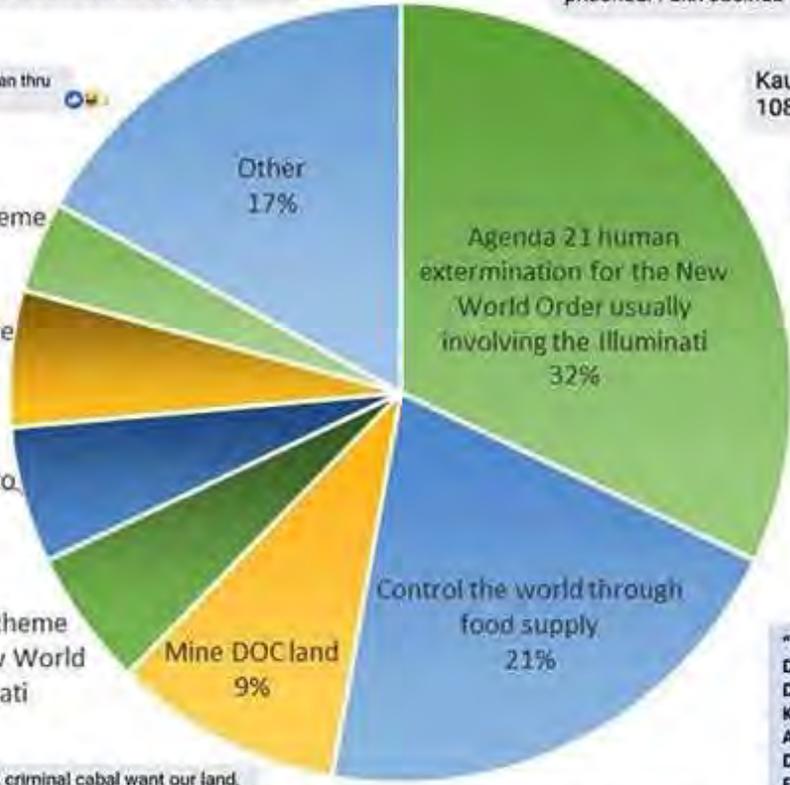

Mine DOC land 9%

Control the world through food supply 21%

Hence the reason why the NWO assassinated President Kennedy, because he called them out, and was doing an ongoing investigation

The corrupt criminal cabal want our land, water, gold ,oil and other minerals. We are also geospherically optimumly placed for direct access to Antarctica

It is going to be an annexe for China! Half way there already!

"[T]o our knowledge, our results are the first to provide empirical evidence for the correlation between a general construct of conspiracist ideation and the general tendency to reject well-founded science."

For the record .if you think you have been poisoned you need to go off shore and get a fat test done .this test can tell you every toxin in the body .If you think I'm wrong Fonterra checks fat content between farms and know within 10 minutes what's in the milk

If a doctor does a test here in New Zealand they loose there licences

1080 drop may have killed rare birds

HELEN MURDOCH

Last updated 05:00, January 19 2015

DAVID HALLETT

POISON FEARS: A 1080 drop may have hurt a population of endangered bird the rock wren in the South Island's Kahurangi National Park.

The Battle for our Birds campaign may have almost wiped out a population of the very species it aimed to protect in

about to unveil their latest 1080 film, the matter is fiddly, but clear.

“We find that the people that actually support 1080 have a link, have a financial link to it,” says Clyde Graf. “It’s a big bureaucracy, so it’s based on money more than anything. We are taking the cameras in so people can actually see the drop zone where they won’t go into . . . because nobody goes into these drop zones and actually looks around. That’s all.”

“We just go for a wander” says Steve Graf. “We just go looking around to see what we can find, because this stuff is meant to be so great.”

■ The Graf Boys' new 1080 documentary, *The Killing Fields – Revelations at Dawn*, will have its inaugural screening on Friday, February 6, in Hokitika in front of an invited audience. Their first 1080 film, called *A Shadow of Doubt*, was released two years ago.

In the dead zone:

🔒 Ban 1080, NZ First says

! years ago

Tweet Share 0 Share Print

New Zealand First wants an immediate moratorium on the use of aerial 1080 poison till it can be banned.

Alternative strategies should be put in place ahead of a total ban on the use of the controversial poison, primary industries spokesman Richard Prosser said.

Research into alternatives to 1080 was not being given sufficient priority while its use was allowed to continue.

"It is a systemic ecotoxin which is banned in most of the rest of the world and for good reason.

"NZ First wants to see an end to the use of 1080 in NZ but there have to be alternative methods in place to deal with predator pests and TB vectors.

"We have to protect our native birds and our deer and cattle herds, and we believe an immediate moratorium will shake Government agencies out of their comfort zone a required sense of urgency in developing ground-based control methods and in seeking an alternative to 1080 where poison does have to be used.

"There are traps and bait stations which can be rolled out to target particular species right now over the great majority of the areas where aerial 1080 is applied at present by-kill of the very native species they're intended to protect the way 1080 does.

"A ban on aerial 1080 is inevitable and an immediate moratorium will give the drive towards that goal the impetus it needs," Prosser said.

"We spend \$100 million a year on dropping 1080 from the sky at the moment and that could pay for an awful lot of boots on the ground and an urgent quest for alternative further unnecessary delay."

*“A vote for NZ First seems to be our best bet to get rid of 1080 Poison.
They have a track record for exposing Government and Corporate Corruption.”*

11-Month-Old Baby Has Stroke After Getting Chickenpox from Unvaccinated Siblings

SEPTEMBER 11, 2018 BY DAVID G. MCAFEE 43 COMMENTS

A previously healthy 11-month-old baby suffered a potentially fatal *stroke* from chickenpox, all because the parents decided to skip vaccinations.

Move to add folic acid to bread goes backward

OLIVIA WANNAN · 05:00, Sep 23 2014

Little more than lip-service has been paid by the Government to its health initiative to prevent neural tube defects such as spina bifida in babies, experts say.

Two years have passed since the former Food Safety Authority said it would push to see folic acid added to half of all bread sold, which could cut the present number of more than 80 babies a year who are found to have neural tube defects.

North Carolina

North Carolina didn't like science on sea levels ... so passed a law against it

In 2012, the state whose low-lying coast lies in the path of Hurricane Florence reacted to a prediction of catastrophically rising seas by banning policies based on such forecasts
